SCIENTIFIC MIRACLES IN THE QURAN (Stages of Human Creation)

Allah said in the Quran: "We created man from an extract of clay. Then We made him as a drop in a place of settlement, firmly fixed. Then We made the drop into an alaqah (leech, suspended thing, and blood clot), then We made the alaqah into a mudghah (chewed substance)..." (23:12-14). This verse speaks about the stages of man's embryonic development. Literally, the Arabic word alaqah has three meanings: (1) leech, (2) suspended thing, and (3) blood clot. In comparing a leech to an embryo in the alaqah stage, we find similarity between the two. Also, the embryo at this stage obtains nourishment from the blood of the mother, similar to the leech, which feeds on the blood of others.

SCIENTIFIC MIRACLES IN THE QURAN (Mountains)

Allah said in the Quran: *“Have We not made the earth as a bed, and the mountains as pegs?”* (78:6-7). Modern earth sciences have proven that mountains have deep roots under the surface of the ground and that these roots can reach several times their elevations above the surface of the ground. This scientific fact was only introduced in the latter half of the 20th century. Mountains also play an important role in stabilizing the crust of the earth. They hinder the shaking of the earth. Allah has said in the Quran: *“And He has set firm mountains in the earth so that it would not shake with you...”* (16:15).

SCIENTIFIC MIRACLES IN THE QURAN (Origin of the Universe)

Modern science clearly indicates that, at one point in time, the whole universe was nothing but a cloud of 'smoke' (i.e. an opaque highly dense and hot gaseous composition). Scientists now can observe new stars forming out of the remnants of that 'smoke'. Allah has said in the Quran: *"Then He turned to the heaven when it was smoke."* (41:11). Because the earth and the heavens above have been formed from this same 'smoke,' we conclude that the earth and the heavens were one connected entity. Then out of this homogeneous 'smoke,' they formed and separated from each other. Allah has said in the Quran: *"Have not those who disbelieved known that the heavens and the earth were one connected entity, then We separated them?"* (21:30).

SCIENTIFIC MIRACLES IN THE QURAN (The Sun's Trajectory)

Allah said in the Quran: "It is He Who created night and day and the sun and moon, each one swimming in a sphere." (21:33). The word "swim" in this verse is describing the movement of the sun in space. It's implying that the sun does not move randomly through space but that it rotates around its axis and follows a course as it does so. The fact that the sun is not fixed in position but rather follows a specific trajectory is also stated in another verse: "And the sun runs to its resting place. That is the decree of the Almighty, the All-Knowing." (36:38). Modern day science proved that the sun moves along a path known as the Solar Apex in the path of the star Vega at an incredible speed of 720,000 kmph.

SCIENTIFIC MIRACLES IN THE QURAN (Clouds)

Scientists studied one kind of rain clouds; the 'cumulonimbus cloud'. Meteorologists studied and found that these clouds go through the following steps to produce rain: 1) clouds are pushed by the wind to an area where they converge. 2) The small clouds join to form a larger one. 3) Updraft movements cause the cloud body to grow vertically in a stacking manner, which in turn causes the cloud body to stretch into cooler regions of the atmosphere, and drops of rain and hail formulate. When they become too heavy, they begin to fall as rain and hail. The Quran says: "Have you not seen how Allah makes the clouds move gently, then joins them together, then makes them into a stack, and then you see the rain come out of it?" (24:43).

SCIENTIFIC MIRACLES IN THE QURAN (The Sun Will Eventually Expire)

Allah said in the Quran: *“And the Sun runs to its resting place. That is the decree of the Almighty, the All-Knowing”* (36:38). The Sun has been emitting heat for around 5 billion years as a result of the constant chemical reactions taking place on its surface. At one point, these reactions will eventually come to an end, and the Sun will lose all its energy and finally go out. Allah said in the Quran: *“When the sun is compacted in blackness.”* (81:1). Also in Sura ar-Rad, verse 2, Allah said: *“Allah is He Who raised up the heavens without any support, and then established Himself firmly on the Throne. He made the Sun and Moon subservient, each running for a specified term. He directs the whole affair. He makes the Signs clear so that hopefully you will be certain about the meeting with your Lord.”*

SCIENTIFIC MIRACLES IN THE QURAN (Finger Prints)

Allah said in the Quran: *"I do swear by the Day of Resurrection. I do swear by the reproachful soul. Does man reckon We shall not gather his bones? Yes indeed; We are able to shape again the tips of his fingers."* (75: 1-4). This emphasis on finger print has a very special meaning, this is because every one's finger print is unique to himself, every person who is alive or who has ever lived in this world, has a set of unique finger prints, that is why the finger prints are accepted as a very important identity exclusive to the owner, and it is used for this purpose around the World.

SCIENTIFIC MIRACLES IN THE QURAN (A Red Rose in the Sky)

Allah said in the Quran: *“When the Heaven shall be cleft asunder, and become rose red, like stained leather.”* (55:37). This term compares an image appearing in the sky to a red rose. This description bears a close similarity to red celestial bodies with a plicate appearance, especially the “Rosette Nebula”. Nebula is the name given to cloud-like masses of gas in space. Before they become nebulae they are stars, and since these stars are very large, they release gasses into space because of their high internal pressure and temperatures. These eruptions of gas are very large and fast. One type of nebula is known as the “Rosette Nebula” because of its resemblance to a rose.

SCIENTIFIC MIRACLES IN THE QURAN (Bone Loss in Old Age)

Allah said in the Quran, at the tongue of Prophet Zakariya: *"And said, 'My Lord, my bones have gone frail and my head is crowned with white, but in calling on You, My Lord, I have never been disappointed'."* (19:4). Bone scanning performed taking detailed measurements using modern technology makes it possible to image the disease known to the medical world as "osteoporosis," or bone loss. Bone, which rather resembles a honeycomb, stores significant quantities of essential minerals such as calcium. Bone mass begins to gradually decline from around the age of 40. In its more advanced stages, this disease, which is mainly seen in the elderly and manifests itself as a loss of bone tissue mass, leads to easy bone breakage.

SCIENTIFIC MIRACLES IN THE QURAN (The Roundness of The Earth)

Allah said in the Quran: "He has created the Heavens and the Earth for Truth. He wraps the night up in the day, and wraps the day up in the night." (39:5). The information given in the verse about the day and the night wrapping each other up includes accurate information about the shape of the world, giving hint to the roundness of the world. It should be remembered that the understanding of astronomy of the time perceived the world differently. It was then thought that the world was a flat plane and all scientific calculations and explanations were based on this belief. However, the Glorious Quran has employed the most definitive words when it came to describing the universe.

SCIENTIFIC MIRACLES IN THE QURAN (The Expanding Earth)

Allah said in the Quran: "It is He Who stretched out the earth and placed firmly embedded mountains and rivers in it and made two types of every kind of fruit. He covers over day with night. There are Signs in that for people who reflect." (13:3). The use of the word "stretched out" in the context of the earth in referring to the formation of mountains and rivers is exceedingly wise. Because looking at the scientific explanation of the formation earth, it does appear that mountains and rivers are formed through the stretching and expansion of the earth. Modern science confirmed that, at one point in time, all the continents had originally been one single landmass.

SCIENTIFIC MIRACLES IN THE QURAN (Orbits)

While referring to the Sun and the Moon in the Qur'an, it is emphasized that each moves in a definite orbit. *"It is He Who created the night and the day, and the sun and the moon. They swim along, each in an orbit."* (21:33). It is mentioned in another verse, too, that the Sun is not static but moves in a definite orbit: *"And the sun runs to its resting place. That is the decree of the Almighty, the All-Knowing."* (37:38). These Quranic facts have been discovered by astronomical observations in our age. The entire universe is full of paths and orbits such as this one, is written in the Qur'an as follows: *"By the sky full of paths and orbits."* (51:7).
